Women 18- 45 Years and Children 1-17 Years

Rainbow trout

Catfish

Goldfish

Bass

Carp

Bluegill or other sunfish

Rainbow trout ❤️

Catfish ❤️

Goldfish

Bass ❤️

Bluegill or other sunfish

❤️ = High in Omega-3s

7 servings a week OR 1 serving a week of bass or catfish—or 2 servings of bluegill

Do not eat

Eat only the skinless fillet. PCBs are in the fat and skin of the fish.

- Remove and throw away the skin before cooking.
- Cook thoroughly and allow the juices to drain away.

What is a serving?

For Adults    For Children

The recommended serving is the size and thickness of your hand. Give children smaller servings.

Why eat fish?

Eating fish is good for your health. Fish have Omega-3s that can reduce your risk for heart disease and improve how the brain develops in unborn babies and children.

What is the concern?

Some fish have high levels of mercury or PCBs. Mercury can harm the brain, especially in unborn babies and children. PCBs can cause cancer.
