Hs. Cynthia Oshita,

I am opposed to fluoride being added to our public drinking water supplies. Fluoridation of public drinking water is one of the most remarkable and widespread deceptions ever conceived. It is astounding that our government has managed to convince the public that fluoride, a known toxin, is actually good for us and then proceeds to add it to our public drinking water supplies. The government is well aware of the toxicity of fluoride, and had no real data supporting any benefits of fluoride. This needs to be stopped.

Thank you,
Holly Quan
